January 1, 2006

Regarding the European Union RoHS Directive;

Dear Customer,

This document pertains to any Pyrathane round or flat belts or Pyrathane round or flat extrudate produced by Pyramid Inc. for your company.

Pyramid Inc. is unable to analyze purchased resins but has obtained assurances from our resin providers stating that they do not intentionally add Polybrominated Biphenyls (PBBs) or Polybrominated Diphenyl Ethers (PBDEs) during their manufacturing process.

In addition, these manufacturers state that lead, mercury, cadmium and hexavalent chromium are not intentionally added during the manufacturing process.

They also indicate, to the best of their knowledge, their suppliers do not use these substances in the manufacture of their products.

All of these providers state that while they do not analyze for these substances they are confident their resins will comply with required levels as they are understood at this time.

It should be noted that Pyramid Incorporated makes no chemical addition to these listed materials.

These statements are applicable to all materials processed by Pyramid Inc. in their non-pigmented natural coloration.

Sincerely,  
Pyramid Inc.

Susan S. Fortune  
President/CEO

This statement is based on current knowledge and information provided by resin suppliers. Pyramid make no warranties, express or implied, and assumes no liability in connection with any use of this information.
